2.2 Run Skype

- .(1) Download Skype software and install it (www.skype-phone.net).
- .The version must be 1.0.0.106 or higher. To make video call,
- .Version 2.0 or higher is required.
- .(2) Run Skype and log in with Skype account.
- .You can create a Skype account as shown below:

The image shows a screenshot of the 'Skype - Create Account' window. The title bar reads 'Skype - Create Account'. The main heading is 'Create a new Skype account'. Below this, there are two tabs: 'New Users - Create a Skype Account' (which is selected) and 'Existing Users - Log in to Skype'. The form contains the following fields and options:

- Choose Skype Name:** A text box containing 'ad-phone'. A red asterisk is to the left. To the right, it says 'From 4 to 32 characters (8 used)'. Below the box, a note reads: 'Skype Name must start with a letter. It can contain numbers, but you should not use spaces.'
- Password:** A text box with six asterisks. A red asterisk is to the left. To the right, it says 'From 4 to 20 characters (5 used)'.
- Repeat Password:** A text box with six asterisks. A red asterisk is to the left.
- Log the user on automatically:** An unchecked checkbox.
- Your E-mail Address:** An empty text box. Below it, a note reads: 'Important Note: Please enter your valid email address or else we will be unable to send you your password if you forget it.'
- Agreement:** A checked checkbox with the text 'Yes, I have read and I accept the [Skype End User License Agreement](#)'. Below it is an unchecked checkbox with the text 'Please contact me about new features, services and other Skype stuff'.

At the bottom of the window, there are two buttons: 'Next >' and 'Cancel'. A note at the bottom of the form area states: 'Fields indicated with red asterisk (*) are required.'

After software's startup, the icon will appear to the system tray as shown below:

That indicates the Skype is successfully connected to Internet. If the icon is shown as , please check your Internet connection.

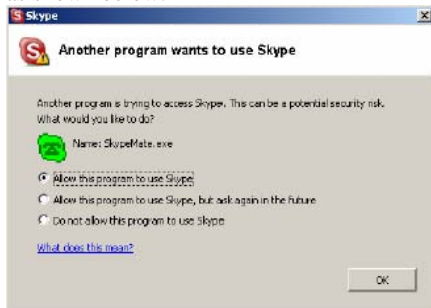

2.3 Run SkypeTerm

(1) Insert SkypeTerm installation CD or download SkypeTerm software from www.skype-phone.net , then install it.

(2) Run SkypeTerm

Double-click the icon  on the desktop, the Skype program will pop up the window as shown below:

Select the first option “Allow this program to use Skype”, click “OK” button.

Note: If you selected the wrong option, you can make another selection. Please see 3. FAQ / problem 3 for detail.

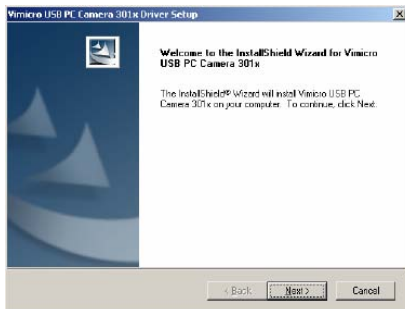

After running SkypeTerm, the icon will appear to the system trays shown:

That indicates the device and Skype are connected successfully. If the icon shown as  (the phone is green and the outside is grey), please run Skype first. If the icon shown as  (the phone is red and the outside is grey), it means USB Video Phone is connected incorrectly. Please reconnect USB Video Phone to PC.

Test the function by doing following steps

Call the PSTN line which is connected to your USB Desktop phone from your mobile phone, and then the phone is ringing.

After 2 rings, all 2 indicators are activated, Enter your password followed by #(eg:123456#) to select the divert function, then you would like to skype call out as same as your Skype a call.

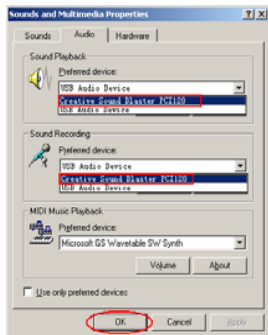

3.1 FAQ

Problem 1

There is no voice comes out when play music?

Resolution

Please execute the “Control Panel->Sound and Video () ->Audio”, set **Sound Playback** and **Sound Recording**'s preference device to your sound card. It shows as below:

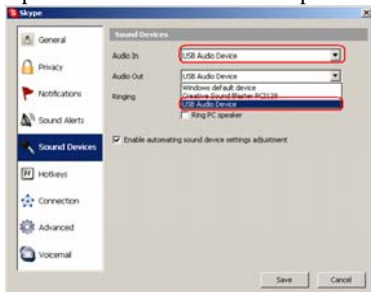

Problem 2

The voice is played from the PC's sound card instead of the USB Speaker Phone e when I make/answer a call?

Resolution

Execute "Tools->Options->Sound Devices" to open the window as below:

Set "Audio In" and "Audio Out" to "USB Audio Device".

Problem 3

Skype has been started, but the icon of SkypeTerm still shown as  (the phone is green and the outside is grey)?

Resolution

Maybe you have selected the wrong option. You can execute “Tools-> Options-> Privacy-> Manage other programs’ access to Skype”, and then choose the needed option, click “Change” button to open the “Manage API Access Control” windows, and make another selection.

Problem 4

The picture in the camera is not clearly?

Resolution

Adjust the camera until the picture is clear.

Problem5

I can’t see anything in the camera?

Resolution

(1) If you have installed driver for other video devices, please uninstall them first.

(2) If these can’t help too, please reinstall the driver for camera.
